

# DNS Servers

FÖR SVENSKA - SE HÄR

If your DNS is hosted by TornevallNET and need to point out a specific amount of nameservers, this is the page you should look at.

## Primary Servers

### Recursive DNS servers (Use for anyone)

DNS-Servers marked with **PARTIALLY RECURSIVE** is, as said, "partially" recursive (allows requests from "anyone"). By means, **chosen networks** - mostly **located in Sweden** - are allowed to use them as they normally use servers like 8.8.8.8, 8.8.4.4, 1.1.1.1, etc. By chosen networks Telia, Tele2, Bredbandbolaget, parts of OVPN.COM, etc etc, are allowed.

**If you feel the resolvers is failing in such cases for you, take a look at the permission list at <https://auth.tornevall.net/dns-recursion.txt> and/or contact [support@tornevall.net](mailto:support@tornevall.net) if you wish to update something. This permission list shows you which networks that is normally allowed to do recursive requests.**

There are more servers like below, that allows recursion but those are the publicly maintained list. Tornevall.org has a bigger backup if it will be necessary (see the bottom of this page).

| Nameserver                             | Address                                       | Type                                 | Lifetime            |
|----------------------------------------|-----------------------------------------------|--------------------------------------|---------------------|
| tornevall.net/tornevall.org shares     |                                               |                                      |                     |
| ns1.tornevall.net<br>ns1.tornevall.org | 109.74.7.218<br>2a02:750:7::375               | <b>PARTIALLY RECURSIVE</b>           | Since december 2015 |
