

# Implementations of v2.x

Normally, when building plugins there's probably a first time for everything. And if there is a second rebuild, compatibility *could* be handy. For this plugin, the codebase have been browsed and all prior filters have been picked up to maintain anything that looks like a compatibility requirement.

**RWC-14** - Handle or abort deprecated actions and filters. **TO DO** contains a list of the hooks and filters that resides in the old version and what happened to them in the way of transformation into the new version. Some of them are very specifically built for v2.x and the prior conditions but some of them are also possibly vital for third party developers that they are following. Especially if they ever consider this plugin as a replacement for the old one. This page explains each filter and their destiny. It will be updated as they are transformed or thrown away.

Filter	Status	Destiny	Issue															
resurs_obsolete_coexistence_disable	IMPLEMENTED	Implemented. But just to make sure that the old version can be disabled, so it won't interfere.	<b>RWC-14</b> DONE															
woocommerce_resurs_bank_<type>_checkout_icon (iconified method)	EVENTUALLY	Payment method based filter. Could be handy to import such method (and be backward-compatible) to automatically display custom icons.	<b>RWC-33</b> TO DO															
resursbank_set_storeid	PLANNED	Storeid. Wants backwards compatibility, but with a planned integration made differently . Should reside in all flows.	<b>RWC-40</b> DONE															
resurs_getaddress_enabled	PLANNED	Disable/Enable getAddress fields in checkout. Could be handy with backwards-compatibility.  <b>Breaking change: Can not be used to disable the getAddress forms, just to enable. To properly disable getAddress forms, instead use <code>rbwc_get_address_disabled</code>.</b>	<b>RWC-43</b> DONE															
resursbank_custom_annuity_string	PLANNED	Customized annuity factors.	<b>RWC-48</b> TO DO															
resurs_match_getpayment_keys	UNDER CONSIDERATION	Resides in refunding section. Changes how the keying is being made while running refunds. If keys are changed the refunding will be more or less sensitive depending on the keys.	<b>RWC-49</b> TO DO															
resurs_refund_price_override	UNDER CONSIDERATION	See <b>RWC-49</b> - resurs_match_getpayment_keys <b>TO DO</b> . Override for refunding. Meaning, if set, refunding on something else than the getPayment price can be overridden.	<b>RWC-50</b> TO DO															
resursbank_temporary_disable_checkout	PLANNED BY FORCE	If the checkout is normally set to be enabled, this gives external plugins a chance to have it disabled. <b>Legends says that this is currently in production use.</b>	<b>RWC-52</b> TO DO															
resursbank_location_last_checkout	PLANNED	Resides in checkout page. Used to track location of RCO so cart can be recalculated for remote again, if customers are jumping around in multiple browser tabs. Could be very effective. Used from v3core (the small release that crashed).	<table border="1"> <thead> <tr> <th>Key</th> <th>Summary</th> <th>T</th> <th>Created</th> <th>Updated</th> </tr> </thead> <tbody> <tr> <td><a href="#">RWC-57</a></td> <td><a href="#">v3core-tracking</a></td> <td><input checked="" type="checkbox"/></td> <td>Jul 15, 2020</td> <td>Jul 20, 2020</td> </tr> <tr> <td><a href="#">RWC-55</a></td> <td><a href="#">resursbank_location_last_checkout</a></td> <td></td> <td>Jul 15, 2020</td> <td>Jul 15, 2020</td> </tr> </tbody> </table> <p>2 issues</p>	Key	Summary	T	Created	Updated	<a href="#">RWC-57</a>	<a href="#">v3core-tracking</a>	<input checked="" type="checkbox"/>	Jul 15, 2020	Jul 20, 2020	<a href="#">RWC-55</a>	<a href="#">resursbank_location_last_checkout</a>		Jul 15, 2020	Jul 15, 2020
Key	Summary	T	Created	Updated														
<a href="#">RWC-57</a>	<a href="#">v3core-tracking</a>	<input checked="" type="checkbox"/>	Jul 15, 2020	Jul 20, 2020														
<a href="#">RWC-55</a>	<a href="#">resursbank_location_last_checkout</a>		Jul 15, 2020	Jul 15, 2020														
resurs_hook_<type>	PLANNED	Resides in an isolation that is probably used to fetch callbacks and allow more actions for them in background.	<b>RWC-56</b> TO DO															
resurs_trigger_test_callback	IMPLEMENTED	Testing callback filter. Allows thirdparties to join the testing in 2.x, probably not necessary but we may keep it. Generates filter with html.	<b>RWC-38</b> DONE															

## Removed filters and actions

Filters marked as **INCOMPATIBLE** may have been implemented but as something else

Filter	Status	Destiny	Issue
allow_resurs_run	REMOVED	Disables/enables old plugin to run in sections where it doesn't belong.  Resides in allowPluginToRun with preventGlobalInterference.  Do not import if possible. Solve the problem.  <b>How about afterShopFlow? Can it handle its own older orders?</b>	 <a href="#">RWC-31</a> REJECTED/REMOVED
resurs_bank_simplified_checkout_methods	INCOMPATIBLE	Unsure of the function. Resides under <b>notify_resurs_admin_parts_disabled</b> which seems to be a notification section.  It may have a history to frontend somewhere, but this will <b>probably</b> be left out.	 <a href="#">RWC-32</a> REJECTED/REMOVED
resurs_method_is_enabled	INCOMPATIBLE	Payment method based function to disable or enable a specific payment method.  Injected in the class creator. Should be rewritten IF imported.	 <a href="#">RWC-34</a> REJECTED/REMOVED
resurs_bank_checkout_methods_enabled	INCOMPATIBLE	Filter the resides in the gateway parts. Code explains... Also resides in flow_omni.	 <a href="#">RWC-47</a> REJECTED/REMOVED
resurs_option	REMOVED	Allows options to be changed on fly. Should not be included.	 <a href="#">RWC-30</a> REJECTED/REMOVED
resurs_bank_model_prefix	REMOVED	Model prefix. Used with the old class definitions where all methods were physically saved as files - for WPMU (Wordpress Network).	 <a href="#">RWC-53</a> REJECTED/REMOVED
woocommerce_resurs_bank_checkout_icon	REMOVED	Icon that seems to be malplaced as RCO is not generating local images.	 <a href="#">RWC-54</a> REJECTED/REMOVED
resurs_pte_account	REMOVED	Not necessary. Old failover for changing account APIs based on username.	 <a href="#">RWC-51</a> REJECTED/REMOVED
resurs_admin_sort_methods_by_value	REMOVED	Payment sorting by value. Skip this and build a sorter that is instead is fetching payment methods as received from the API (nordic rules requires this).	 <a href="#">RWC-36</a> REJECTED/REMOVED
resursAdminJs	REMOVED	Localization that reminds me about the current installment.	 <a href="#">RWC-45</a> REJECTED/REMOVED
session handling filters	REMOVED	(resursbank_start_session_before /resursbank_start_session_outside_admin_only)  As it seems we do not use session stuff (yet) in the current release.	 <a href="#">RWC-46</a> REJECTED/REMOVED
woocommerce_get_sections_<id>	REMOVED	Custom configurable sections.	 <a href="#">RWC-35</a> REJECTED/REMOVED
resurs_bank_init_enabled	REMOVED	Yet another disabler. Allows disabling of the initial class gateway generatator.	 <a href="#">RWC-37</a> REJECTED/REMOVED
resurs_bank_js_payment_methods	REMOVED	Filter that handles customer-checkout-backend eventually.  I don't see the needs of it here.	 <a href="#">RWC-44</a> REJECTED/REMOVED
resurs_bank_force_govid_field	REMOVED	Fixed description: Force getAddress information to show government id.	 <a href="#">RWC-116</a> - resurs_bank_force_govid_field TO DO
resurs_methodlist_timediff	REMOVED	An emergency payment method list updater that allows us to change the final timediff.  Probably not necessary.	 <a href="#">RWC-44</a> REJECTED/REMOVED
resurs_trigger_test_callback_timestamp	INCOMPATIBLE	Same as  <a href="#">RWC-38</a> - resurs_trigger_test_callback <input type="checkbox"/> <b>DONE</b> but for timestamps. Don't really know why it's here (yet).	 <a href="#">RWC-39</a> REJECTED/REMOVED
