

/api/mcu/categories

Method: [GET](#)

A very simple request that list the current registered categories in the API.

| Column | Column Type | Description |
|------------|-------------|--|
| cid | int | Category id. |
| category | string | The category name. |
| background | string | Background colour in design. Chosen by us. |
| csortorder | int | If we need to sort the categories, this is the primary sorting order which has priority over phases. By means, if a title does not really belong to a movie phase, they are down prioritized. |

```
{
  "cid": "2",
  "category": "Phase 2",
  "background": "#b3f5ff",
  "csortorder": "2",
  "phase": "2",
  "ourSortOrder": [
    "mcutime",
    "premiere",
    "season",
    "episode"
  ]
},
```
