

TornevallWEB v1-v5

This document holds the primary documentation of TornevallWEB and services.

Tornevall Networks was running on [TornevallWEB v3](#) for a long time, but due to bad coding [TornevallWEB v4](#) came up in our minds. This project failed after power-hardware-failure in December 2015 and now we're aiming at [TornevallWEB v5](#) instead.

TornevallWEB v4

The goal with v4 was to rewrite of the current base of v4. Now, we realize that this failed. A bunch of older flaws in our AJAX-fetcher was however fixed and removed, so the AJAX engine would probably survive the switch.
